

DRAFT PRIORITY HEALTH GOALS – 2013

After consultation with members of our school community (staff, parents, whanau) the following priority goals for our Tauriko School Health Curriculum have been drafted.

- *For students to have an age appropriate understanding of the school values and to know how to apply these to a range of challenging situations.
(Respect, Excellence, Integrity and Innovation)*
- *To foster resilience in students and empower them with strategies to cope in the ever-changing world around them.*
 - *To develop children who are well – socially, mentally, spiritually, physically and emotionally.*
- *For students to develop decision making strategies and skills that enable them to make good choices for positive friendships and relationships.*

Please email Lisa Rose with any comments, queries, suggestions regarding the draft priority goals.
